World Fungus Day- 2nd, October,2022

The world is visually dominated by animals and plants, but **this world would not have been possible without fungi. Fungi play a crucial role in the balance of ecosystems.** They are essential to the recycling of nutrients in all terrestrial habitats because they are the dominant decomposers. They are also Mycorrhizal partners with plants. Humans use fungi for many purposes, including as food. Fungi are model research organisms as well. But, most common people, and even many biologists, do not, however, realize the importance of fungi. So, **awareness about this vital component of our planet must be spread throughout the world.** If people know something about fungi, there is a much stronger chance that they will protect them for the future of our ecosystems and, indeed, for the betterment of mankind. In this context, British Mycological Society (BMS) has taken initiative to organize "World Fungus Day" on 2nd October 2021 with the main aim to put on events for
