“Visit to the Tuberous Underground Edible Root Festival”

(Kandmule Utsav)

.....
One Page Report

Starchy root and tuber crops play a vital role in the human diet. There are a number of roots and tubers that contribute to extensive biodiversity. Thus, they add variety to the diet in addition to offering desirable nutritional and health benefits. A variety of foods can be used in industrial applications mainly for their nutritional and health benefits. So, Nisarag Ankur, Kolhapur, has organised an exhibition on Kandamulancha Utsav "in collaboration with Garden Club Kolhapur and Shri Shahu Chatrapati Shikshan Sanstha" on January 13, 2023, at Shahaji College, Dasara Chowk, Kolhapur. Twelve students of B.Sc. III Botany and four staff members visited this exhibition. In this exhibition, more than 100 different types of wild and cultivated tubers were displayed. From this exhibition, students get information about different varieties of tubers, like *Dioscora* species, Taro, Yam, *Costus*, Turmeric, *Amorphophallus*, Potato, Onion, etc. and their nutritional and medicinal importance. Prof. M. V. Bachulkar and Mr. Ajinkya Berde guided and gave information on these tubers, their common names, botanical names, locations where they grow and their various uses in day-to-day life.
