

“Dissemination of Education for Knowledge, Science and Culture”

- Shikshanmaharshi Dr. Bapuji Salunkhe

**Shri Swami Vivekanand Shikshan Sanstha's  
Vivekanand College, Kolhapur  
(Autonomous)**

***DEPARTMENT OF B.C.A***

**B.C.A Part – I  
Semester-I&II**

**SYLLABUS**

**Under Choice Based Credit System**

**To be implemented from Academic Year 2023-24**

**CHOICE BASED CREDIT SYSTEM**

**B.C.A – I (Sem -I and II)**  
**Course Structure**  
**to be implemented from 2023-24**

**B.C.A Part – I NEP**  
**Semester – I Part- I**  
**Programming in C –I (DSC04COM11)**  
**Theory: 30 Teaching Hours Credits - 2**

**Course Outcomes** - At the end of this course students will be able to:

- CO1. Understand the problem solving techniques.
- CO2. Develop algorithm and flowcharts for different problems.
- CO3. Design programs using control statements.
- CO4. Handle multi-dimensional array.

| Unit | Contents   | Hours Allotted |
|------|--|----------------|
| 1    | <b>Introduction to C</b> : ALGORITHM, advantages and disadvantages FLOWCHARTS,Character set,Identifiers: variables, constants, keywords.,Tokens,Data types.  | 7.5            |
| 2    | <b>Operators</b> : Arithmetic, relational, logical, assignment, bitwise, increment/decrement,Comments-types of comments, Header Files (conio,stdio,string,math). Structure of C Program, Input and Output Functions  | 7.5            |
| 3    | <b>Control Structures</b> : Conditional statements: if, If-else nested if-else, switch statement. Loops: while, for, do...While loop, Unconditional statements: Break, continue, exit, goto statements.  | 7.5            |
| 4    | <b>Arrays and Strings</b> : Arrays- Meaning and definition, Declaration, Initialization and types of arrays (single and multidimensional arrays).<br><b>Strings</b> : Meaning and definition, Declaration, Initialization String functions strlen(), strrev(), strlwr(),strupr(), strcat(), strcmp() , strcpy(). | 7.5            |

7. Pointers in C – Yashwant Kanetkar

**B.C.A Part – I NEP**  
**Semester – I Part- I**  
**Basic Web Technology (DSC04COM12)**  
**Theory: 30 Teaching Hours Credits - 2**

**Course Outcomes** - At the end of this course students will be able to:

- CO1. Understand the basic working of Internet and its main services.
- CO2. Create web pages using HTML.
- CO3. Applying CSS styles in web page development.
- CO4. Utilize theoretical skills and practical experience of web design.

| Unit | Contents   | Hours Allotted |
|------|--|----------------|
| 1    | <b>Introduction to HTML-5:</b><br>What is HTML-5 , Basic Tags, Structure, Layout, Web Development Process Overview of HTML Tags, Formatting Tags, Headings(H1-H6), Tags and Attributes, Paragraph Tag, FONT Tag,                                       | 7.5            |
| 2    | <b>List Tags:</b><br>Ordered and Unordered Tags, Hyperlink, <BR/> <HR> <Marquee> Tags, Image <img> Tag with all attributes, Image and Image map. <TABLE>.. </TABLE> tag with all attributes. .<FORM> tag, Examples and case studies based on all tags. | 7.5            |
| 3    | <b>Basic of CSS</b><br>Introduction to CSS, CSS Basics, Syntax / Rule of CSS , Selectors, properties and values, Applying CSS to HTML tags, Types : Internal, Inline, External CSS with Properties   | 7.5            |
| 4    | <b>CSS – Page Layout</b><br>Case Study: Select any topic of your interest and Design Project using above technologies which suit for Desktop and Laptop computer screen only.  | 7.5            |

**B.C.A Part – I NEP**  
**Semester – I Part- I**  
**Financial Accounting with Tally-I (MIN04ACC11)**  
**Theory: 30 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:  
CO1. Developing the ability to uses accounting concepts and principles.  
CO2. Use basic accounting terminology, procedures and systems of maintaining accounts records.  
CO3. Understand the need for Journal.  
CO4. Develop the understanding for posting of transaction and balancing of account.

| Unit | Content   | Hours Allotted |
|------|---|----------------|
| 1    | <b>Introduction to Financial Accounting</b><br>Meaning and Definition of Financial Accounting, Objectives of Accounting, Various users of Accounting Information.   | 7.5            |
| 2    | <b>Accounting Terminology:</b><br>Accounting Concepts and Conventions, Double entry system, Types of Accounts and Golden rules of accounting. Books of Prime Entry, Subsidiary Books and Ledger Creation. | 7.5            |
| 3    | <b>Journal:</b><br>Introduction ,Importance of journal ,subsidiary books, (problem based on journal).   | 7.5            |
| 4    | <b>Ledger:</b><br>Introduction to cash book ,Types of cash book, preparation of cash book Introduction to ledger ,ledger posting.   | 7.5            |

**B.C.A Part – I NEP**  
**Semester – I Part- I**  
**Principles of Management-I (MIN04MGT11)**  
**Theory: 30 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:

CO1. Student will be component to deliver the basic managerial function

CO2. Student will be able to design appropriate organizational structure for smooth running of organization.

CO3. Student will be able to understand functions of staffing.

CO4. To gain knowledge about all management process and create understanding in detail about the application of management

| Unit | Content   | Hours Allotted |
|------|---|----------------|
| 1    | <b>Introduction to Management</b><br>Definition of Management, Nature and Role of manager in organization, Functions of Management, Contribution of F.W. Taylor, Henry Fayol and, Peter Drucker to management theory. | 7.5            |
| 2    | <b>Organizing</b><br>Meaning of Organizing, Definition & Importance of Organizing, Principles of organization.  | 7.5            |
| 3    | <b>Planning</b><br>Planning: Meaning of planning, Definition & Nature of planning, Steps in Planning.   | 7.5            |
| 4    | <b>Staffing:</b><br>Meaning & Definition of staffing, Process, Recruitment & selection of staffing.   | 7.5            |

**References:**

1.Principles of management : P. Subba Rao

2. Essential of management : Kncotz & O'Donnell

3. Principles and practices of management : L.M Prasad

**B.C.A Part – I NEP**  
**Semester – I Part- I**  
**Mathematics-I (OEC04MAT11)**  
**Theory: 30 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:  
 CO1. Familiarize basic Concept of Set theory.  
 CO2. Recognize different types of function  
 CO3. Compute the addition and multiplication of matrices.  
 CO4. Find inverse of matrices by Elementary transformation and Adjoint method.

| Unit | Content   | Hours Allotted |
|------|---|----------------|
| 1    | <b>Set and Relation</b><br>1.1 Meaning of Set.<br>1.2 Method of describing of a set: Tabular form, Set-builder form<br>1.3 Types of sets<br>1.4 Operation on sets: Union of sets, Intersection of sets, Difference of sets.<br>1.5 De Morgan’s laws<br>1.6 Venn Diagram.<br>1.7 Cartesian product of two sets.<br>1.8 Idempotent laws, Identity laws, Commutative laws, Associative laws, Distributive laws, Inverse laws, Domination laws, Absorption laws, Involution laws.<br>1.9 Examples based on above<br>1.10 Definition of Relation, Domain, Co-domain and Range of Relation. | 9              |
| 2    | <b>Function</b><br>2.1 Definition of Function.<br>2.2 Types of Function<br>2.3 Representation of Function.<br>2.4 Algebra of Function.<br>2.5 Inverse function  | 5              |

**DSCComputerLab -I (DSC04PRA19)**  
**Theory: 00 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:

**CO1.** To learn advance structured and procedural programming and to improve C programming skills.

**CO2.** To understand the basic structure of a C program.

**CO3.** To gain knowledge of various programming errors.

**CO4.** To enable the students to make flowchart and design an algorithm for a given problem.

| Sr. No. | Content   |
|---------|---|
| 1       | Write a program to addition of two numbers.   |
| 2       | Write a program to get number from user and display its square and cube.              |
| 3       | Write a program to find the sum of first n natural numbers.                           |
| 4       | Write a program to display whether a given number is even or odd.                     |
| 5       | Write a program to find greater number from given two/three number.                   |
| 6       | Write a program to display table of given number (by methods sum & multiplication).   |
| 7       | Write a program to calculate given power of given number. (Calculate raise to)        |
| 8       | Write a program to calculate factorial of given number.                               |
| 9       | Write a program to calculate sum of digits of a given number.                         |
| 10      | Write a program to reverse the given number and find whether it is palindrome or not. |
| 11      | Write a program to find whether a given number is prime number or not.                |
| 12      | Write a program to add two Matrices; Use two Dimensional arrays                       |
| 13      | Write a program to find the product of given two matrices.                            |
| 14      | Write a program to accept the range and generate Fibonacci Series.                    |
| 15      | Write a program to find given number is Armstrong or not.                             |

**B.C.A Part – I NEP**  
**Semester – I Part- I**  
**DSCComputerLab -II (DSC04PRB19)**  
**Theory: 00 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:

CO1. To learn advance structured and procedural programming and to improve C programming skills.

CO2. To understand the basic structure of a C program.

CO3. To gain knowledge of various programming errors.

CO4. To enable the students to make flowchart and design an algorithm for a given problem.

| Sr No. | Content   |
|--------|---|
| 1      | Create HTML page to add basic tags  |
| 2      | Write an HTML code to illustrate the usage of the following: • Ordered List • Unordered List • Definition List.                                   |
| 3      | Write HTML page to add image and 2 paragraph, and insert a table.   |
| 4      | Use </a> tag and Div tag and design page  |
| 5      | Write an HTML code to demonstrate the usage of inline CSS. C3   |
| 6      | Write an HTML code to demonstrate the usage of internal CSS.  |
| 7      | Write an HTML code to demonstrate the usage of external CSS.  |
| 8      | Design a simple website using Header, Menubar , content, footer on any topic Home page having three links: About Us, Our Services and Contact Us. |

**B.C.A Part – I NEP**  
**Semester – I Part- I**  
**OEC-MATHS Lab-I (DSC04MAT19)**  
**Theory: 00 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:

CO1. To impart the required knowledge of Mathematics and statistics for managerial activities among students.

CO2. To inculcate in students the fundamental mathematical background in computer science.

CO3. To gain knowledge about Sets, Relations Functions, Matrices, Mathematical logic, and group theory.

CO4. Develop analytical ability to solve real-world problems using these methodologies.

| Sr No. | Content  |
|--------|--|
| 1      | Union of set, Intersection of set                      |
| 2      | Algebra of Function                                    |
| 3      | Determinant of Matrix                                  |
| 4      | Algebra of Matrices (Addition and Substitutions)       |
| 5      | Inverse of matrix by Elementary Transformation Method. |
| 6      | Inverse of matrix by Adjoint Method                    |

**B.C.A Part – I NEP**  
**Semester – I Part- I**  
**OEC- STAT Lab-II (DSC04STA29)**  
**Theory: 00 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:

CO1. Construction of frequency distribution and graphical methods.

CO2. Compute measures of central tendency to various data sets

CO3. Compute measure of dispersion to various data sets

CO4. Compute correlation coefficient, regression coefficient

| Sr No. | Content  |
|--------|--|
| 1      | Construction of frequency distributions and graphical methods. |
| 2      | Measures of Central tendency (Ungrouped data)                  |
| 3      | Measures of Central tendency (Grouped data)                    |
| 4      | Measures of dispersion (Ungrouped data).                       |
| 5      | Measures of dispersion (Grouped data).                         |
| 6      | Computation of correlation coefficient and scatter diagram.    |

**B.C.A Part – I NEP**  
**Semester – II Part- I**  
**Programming in C- II (DSC04COM21)**  
**Theory: 30 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:

**CO1.** Ability to design and develop Computer programs, analyses, and interprets the concept of pointers, declarations, initialization, operations on pointers and their usage

**CO2.** Able to define data types and use them in simple data processing applications also he/she must be able to use the concept of array of structures and file Handling.

**CO3.** Develop confidence for self-education and ability for life-long learning needed for computer language

**CO4.** Students can write programs using advance C concepts.

| Unit | Content   | Hours Allotted |
|------|---|----------------|
| 1    | <b>User defined functions and pointer</b><br>Form of a c function, return value and their type, calling a function, category of a functions, Actual and Formal arguments, functions with array.   | 7.5            |
| 2    | <b>Pointers</b><br>Understanding pointers, accessing address of variable, declaration and initializing pointers, pointer expression, pointer to array and functions, function call by value and by reference. Dynamic memory allocation-malloc(),calloc(),realloc().  | 7.5            |
| 3    | <b>Structures and Unions</b><br>Defining and processing a structure, array of structure, array within structure, structure within structure, Defining and processing a Unions. Difference between structure and union.  | 7.5            |
| 4    | <b>File Handling</b><br>Defining and opening a file, File opening mode- open, modify, write, Closing a file, Functions:fopen(), fclose(), fscanf(), Input/Output Operations on file: getc(), putc(), getw(), putw(), fprintf(), fscanf(), ftell(), fseek(), rewind(). | 7.5            |

2. Business Communication – Prakash Herekar

**B.C.A Part – I NEP**  
**Semester – II Part- I**  
**English -II (AEC04ENG21)**  
**Theory: 00 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:

CO1. To develop students' understanding through laboratory activities to solve problems related to above stated concepts.

CO2. To develop students' understanding through laboratory activities to solve problems related to above stated concepts.

CO3. Handle file for real time application

CO4. Handle file for real time application

| Sr. No. | Content  |
|---------|--|
| 1       | Write the programs to understand categories of function. (Minimum three programs)  |
| 2       | Write a program to demonstrate actual arguments and formal arguments.  |
| 3       | Write a program to calculate mean two numbers which are given at command line.   |
| 4       | Write a programs based on Pointer  |
| 5       | Write a program which swap two number using a) call by value and b) call by reference.   |
| 6       | Write programs which create student structure which accept stud roll no, student name, address, subject marks, and percentage and display same on screen.  |
| 7       | Write a program to calculate factorial of given number by using user defined function.   |
| 8       | Create a structure employee (id, name, salary). Accept details of n employees and write a menu driven program to perform the following operations. Write separate functions for the different options. i) Search by name ii) Search by id iii) Display all |
| 9       | Write a program based on union.  |
| 10      | Write a program to count the no. of words in a given text file.  |
| 11      | Write a program to remove blank lines from a file.   |
| 12      | Write a program to copy content of one file into another file.   |

**B.C.A Part – I NEP**  
**Semester – II Part- I**  
**DSCComputerLab-III (DSC04PRA29)**  
**Theory: 00 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:

CO1. Ability to design and develop Computer programs, analyzes, and interprets the concept of pointers, declarations, initialization, operations on pointers and their usage.

CO2. To develop students' understanding through laboratory activities to solve problems related to above stated concepts.

CO3. Apply pointers for developing simple programs.

CO4. Handle file for real time application.

| 12      | Write a program to copy content of one file into another file.   |

**B.C.A Part – I NEP**  
**Semester – II Part- I**  
**DSCComputerLab-IV (DSC04PRB29)**  
**Theory: 00 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:

- CO1. Understand Web designing techniques.
- CO2. Develop commercial web development.
- CO3. Organize content, hosting and web publishing.
- CO4. Create well-formed valid HTML documents.

| Sr No. | Content   |
|--------|---|
| 1      | Write a Javascript code to welcome user.  |
| 2      | Write a Javascript code to show arithmetic calculation with user input                          |
| 3      | Write a Javascript code to check given number is even or odd.                                   |
| 4      | Write a Javascript code to calculate factorial of given number.                                 |
| 5      | Write a Javascript code to calculate Length of string.  |
| 6      | Write a Event Driven Javascript code to display 7 different colours.                            |
| 7      | Write a Event Driven Javascript code to convert the given string into upper case and lower case |
| 8      | Write a Event Driven Javascript code to accept a string from user and display number of vowels  |

**B.C.A Part – I NEP**  
**Semester – II Part- I**  
**OEC-MATHS Lab-II (DSC04MAT29)**  
**Theory: 00 Teaching Hours Credits – 2**

**Course Outcomes** - At the end of this course students will be able to:

CO1. To inculcate in students the fundamental mathematical background in computer science.

CO2. To gain knowledge about Mathematical logic, permutation, combination and Group theory.

CO3. Understand the basic concepts of Mathematical logic, permutation, combination and Group theory.

CO4. Develop analytical ability to solve real-world problems using these methodologies.

| <b>Sr No.</b> | <b>Content</b>  |
|---------------|---|
| <b>1</b>      | Example of Equivalence relation using Truth table.          |
| <b>2</b>      | Example of Equivalence relation without using Truth table.  |
| <b>3</b>      | Permutations when all object are distinct.                  |
| <b>4</b>      | Permutations when all object are distinct and not distinct. |
| <b>5</b>      | Examples of Combination                                     |
| <b>6</b>      | Isomorphic graph  |

**B.C.A Part – I NEP**  
**Semester – II Part- I**  
**OEC- STAT Lab-II (DSC04STA29)**  
**Theory: 00 Teaching Hours Credits – 2**

**Course Outcomes** – At the end of this course students will be able to:

CO1. Compute probabilities to different events.

CO2. Understand the concept of discrete random variable, probability distribution and mathematical expectations.

CO3. Apply various discrete distributions.

CO4. Acquire a concise and clear description of statistical problems.

| <b>Sr No.</b> | <b>Content</b>  |
|---------------|---|
| <b>1</b>      | Applications of Discrete Uniform & Binomial distribution.                         |
| <b>2</b>      | Applications of Poisson distribution  |
| <b>3</b>      | To compute conditional probabilities and probabilities of independence of events. |
| <b>4</b>      | To compute univariate probability distributions.                                  |
| <b>5</b>      | Applications of discrete uniform distribution and binomial distribution.          |
| <b>6</b>      | Application of Poisson distribution.  |

## Evolution Pattern

### Nature of Theory Question paper:

QUESTION PAPER PATTERN FOR SEMESTER I & II

Total Marks-40

Duration- 2 Hrs

### Instructions:

1. All questions are compulsory.
2. Figures to right indicate full marks.

Q1.A. MCQ

-5 marks

B. Fill in the blanks / Match the pair / True false  
marks

-3

Q2. Long answer questions / Brief answer questions (Solve any 2 out of 3)

-

16 marks

Q3. Short Note (Solve any four out of five)

-

16 marks

### Internal evaluation

Total Marks- 10 (Test- 3 marks, Home Assignment-3 marks, Dept.Activities-02 marks, Oral-02 marks)
