Class – B.Sc (CS) Entire  
Subject – C# Programming

# HTML Server Controls In ASP.Net

- HTML server controls are HTML tags understood by the server.
- HTML elements in ASP.NET files are, by default, treated as text. To make these elements programmable, add a runat="server" attribute to the HTML element.
- This attribute indicates that the element should be treated as a server control.
- All HTML server controls must be within a <form> tag with the runat="server" attribute
- ASP.NET requires that all HTML elements must be properly closed and properly nested.

## HTML server controls offer the following advantages:

- The HTML server controls map one to one with their corresponding HTML tags.
- When the ASP.NET application is compiled, the HTML server controls with the runat=server attribute are compiled into the assembly.
- Most controls include an OnServerEvent for the most commonly used event for the control. For example, the `<input type=button>` control has an OnServerClick event.
- The HTML tags that are not implemented as specific HTML server controls can still be used on the server side; however, they are added to the assembly as `HtmlGenericControl`.
- When the ASP.NET page is reposted, the HTML server controls keep their values.

# Different HTML Controls

HTML Server Control	Description
<a href="#"><u>HtmlAnchor</u></a>	Controls an <a> HTML element
<a href="#"><u>HtmlButton</u></a>	Controls a <button> HTML element
<a href="#"><u>HtmlForm</u></a>	Controls a <form> HTML element
<a href="#"><u>HtmlGeneric</u></a>	Controls other HTML element not specified by a specific HTML server control, like <body>, <div>, <span>, etc.
<a href="#"><u>HtmlImage</u></a>	Controls an <image> HTML element
<a href="#"><u>HtmlInputButton</u></a>	Controls <input type="button">, <input type="submit">, and <input type="reset"> HTML elements
<a href="#"><u>HtmlInputCheckBox</u></a>	Controls an <input type="checkbox"> HTML element

HTML Server Control	Description
<a href="#">HtmlInputCheckBox</a>	Controls an <input type="checkbox"> HTML element
<a href="#">HtmlInputFile</a>	Controls an <input type="file"> HTML element
<a href="#">HtmlInputHidden</a>	Controls an <input type="hidden"> HTML element
<a href="#">HtmlInputImage</a>	Controls an <input type="image"> HTML element
<a href="#">HtmlInputRadioButton</a>	Controls an <input type="radio"> HTML element
<a href="#">HtmlInputText</a>	Controls <input type="text"> and <input type="password"> HTML elements
<a href="#">HtmlSelect</a>	Controls a <select> HTML element

HTML Server Control	Description
<a href="#">HtmlTable</a>	Controls a <table> HTML element
<a href="#">HtmlTableCell</a>	Controls <td>and <th> HTML elements
<a href="#">HtmlTableRow</a>	Controls a <tr> HTML element
<a href="#">HtmlTextArea</a>	Controls a <textarea> HTML element
<a href="#">HtmlInputCheckBox</a>	Controls an <input type="checkbox"> HTML element
<a href="#">HtmlInputFile</a>	Controls an <input type="file"> HTML element
<a href="#">HtmlInputHidden</a>	Controls an <input type="hidden"> HTML element
<a href="#">HtmlInputImage</a>	Controls an <input type="image"> HTML element

HTML Server Control	Description
<a href="#">HtmlInputRadioButton</a>	Controls an <code>&lt;input type="radio"&gt;</code> HTML element
<a href="#">HtmlInputText</a>	Controls <code>&lt;input type="text"&gt;</code> and <code>&lt;input type="password"&gt;</code> HTML elements
<a href="#">HtmlSelect</a>	Controls a <code>&lt;select&gt;</code> HTML element
<a href="#">HtmlTable</a>	Controls a <code>&lt;table&gt;</code> HTML element
<a href="#">HtmlTableCell</a>	Controls <code>&lt;td&gt;</code> and <code>&lt;th&gt;</code> HTML elements
<a href="#">HtmlTableRow</a>	Controls a <code>&lt;tr&gt;</code> HTML element
<a href="#">HtmlTextArea</a>	Controls a <code>&lt;textarea&gt;</code> HTML element
