

Name of the Teacher – Vaishali C. Dalvi
Class – B.Sc (CS) Entire
Subject – C# Programming

Lecture 10

Framework Class Library

- It is a collection of reusable, object oriented class libraries including classes, interfaces, data types and methods.
- It is just like header files in c, c++ and package in Java.

- .Net standard set of libraries, referred as Base Class Libraries (BCL-Core set) or Framework Class Libraries (FCL-Complete set)
- Provides implementation for many general & app specific types, algorithms & utility functionality.

Base Class Library					
System. Web			System. Windows. Form		
Services	UI	Session State	Design	Component Model	
Security	Catching	Configuration			
System. Data			System.XML		
Oledb	SQL Client	ODBC	XSLT	Serialization	X-Path
System					
Collection	IO	Security	NET	Configuration	Runtime
Remoting	Diagnostic	Reflection	Text	Service Process	Resources
Threading	Globalization	Serialization
