* Indicates required question

All questions are compulsory. Each question carry 2 marks

Option 1

Name of student *

Your answer

Cell theory was proposed by *

2 points

- Watson
- Schawan
- Marks
- Piter

This process donot require oxygen *

2 points

- Respiration
- Oxidation
- Fermentation
- None of these

Prokaryotic cell contain.....s ribosome *

2 points

- 70
- 80
- 85
- Other:

..... Is father of genetics *

2 points

- Mendel
- Watson
- Jonsen
- None of these

..... Is also known as. energy currancy of cell. *

2 points

- ALS
- ATP
- GCS
- GTP

.... Is reductional cell division *

2 points

- Mitosis
- Amitosis
- Meosis
- Budding

..... Is part of electrone transport chain *

2 points

- Cytochrome
- Cytokine
- Interferons
- Antibodies

Enzymes are *

2 points

- Hormone
- Biological catalyst
- Biosensor
- Operon

..... nm Range of visible region in light spectrum

2 points

- 200-400
- 400-700
- 800-1000
- 100-300

Use of Is take place in biological war *

2 points

- Pathogen
- Explosive
- Acid
- None of these

..... Is aqueous system which resists the pH change by small amount of addition of acid or alkali 2 points

- Solution
- Aerogel
- Buffer
- Suspension

Diabetics melitus is having..... type * 2 points

- 3
- 2
- 4
- 1

..... Is powerhouse of the cell * 2 points

- Chloroplast
- Endoplasmic reticulum
- Mitochondrion
- Nucleus

In Greek meaning of glucose is *

2 points

- Sweet
- Invert sugar
- Invert disk
- Sweet wine

Enzymes are In nature *

2 points

- Carbohydrates
- Lipid
- Nucleic acid
- Protein
