Unit test 1- Scope of Biotechnology

Time: 40 Minutes

Marks: 50

Instructions:

1. All questions are compulsory.
2. Each question carries 1 mark.
3. Choose the most appropriate answer.

44
50

Prashant

Name of student-

Patil Prashant

1. Biotechnology is the application of

- ☒ A) Physics ☒ B) Biology and Technology ☐ C) Mathematics ☐ D) Astronomy

2. The term "Biotechnology" was first coined by

- ☒ A) Louis Pasteur ☐ B) Karl Ereky ☐ C) Gregor Mendel ☐ D) Robert Koch

3. Karl Ereky coined the term biotechnology in

- ☒ A) 1859 ☐ B) 1865 ☐ C) 1919 ☐ D) 1953

4. Which is considered the oldest example of biotechnology?

- ☒ A) Tissue culture ☒ B) Fermentation ☐ C) Genetic engineering ☐ D) PCR

5. Bread making is an example of----- biotechnology

- ☒ A) Modern ☐ B) Traditional ☐ C) Medical ☐ D) Nanobiotechnology

6. Which microorganism is commonly used in bread making?

- ☒ A) E. coli ☐ B) Lactobacillus ☒ C) Yeast ☐ D) Rhizobium

7. Green biotechnology is mainly related to

- ☒ A) Agriculture ☐ B) Medicine ☐ C) Marine science ☐ D) Industry

8. Red biotechnology is associated with

- ☒ A) Medicine ☐ B) Agriculture ☐ C) Environment ☐ D) Food processing

9. White biotechnology is mainly used in

- ☒ A) Industrial production ☐ B) Agriculture ☐ C) Marine biology ☐ D) Forestry

10. Blue biotechnology deals with

- ☒ A) Forests ☒ B) Marine organisms ☐ C) Space research ☐ D) Soil science

11. Yellow biotechnology is associated with

12. Grey biotechnology focuses on

- ☒ A) Environmental protection ☐ B) Medical treatment ☐ C) Industrial production ☐ D) Genetics

13. Which branch deals with genetic engineering?

- ☒ A) Modern biotechnology ☐ B) Traditional biotechnology ☐ C) Chemical engineering ☐ D) Mechanical engineering

14. Recombinant DNA technology was developed in

- ☒ A) 1973 ☒ B) 1919 ☐ C) 1865 ☐ D) 1950

15. DNA double helix was discovered by

- ☒ A) Mendel and Darwin ☒ B) Watson and Crick ☐ C) Pasteur and Koch ☐ D) Fleming and Jenner

16. The Father of Genetics is

- ☒ A) Louis Pasteur ☒ B) Gregor Mendel ☐ C) Watson ☐ D) Crick

17. Louis Pasteur is known for his work on

- ☒ A) Fermentation ☐ B) DNA sequencing ☐ C) PCR ☐ D) Cloning

18. PCR was invented by

- ☒ A) Kary Mullis ☐ B) Watson ☐ C) Crick ☐ D) Mendel

19. Which of the following is an achievement of biotechnology?

- ☒ A) Production of insulin ☐ B) Stone carving ☐ C) Iron smelting ☐ D) Bridge construction

20. Bt cotton is developed to resist

- ☒ A) Drought ☒ B) Insects ☐ C) Flood ☐ D) Salinity

21. Golden Rice is rich in

- ☒ A) Vitamin A ☐ B) Vitamin C ☐ C) Vitamin D ☐ D) Iron

22. Biotechnology helps in producing

- ☒ A) Vaccines ☐ B) Plastic ☐ C) Cement ☐ D) Coal

23. Gene therapy is mainly used for

- ☒ A) Treating genetic disorders ☐ B) Road construction ☐ C) Food preservation ☒ D) Textile production

24. Which technique helps identify criminals using DNA?

- ☒ A) DNA fingerprinting ☐ B) ELISA ☐ C) Fermentation ☐ D) Microscopy

25. Which field benefits from biofertilizers?

- ☒ A) Agriculture ☐ B) Astronomy ☐ C) Geology ☐ D) Architecture

Electron
ics
erine
26. Biofuels are produced using

- ☒ A) Living organisms B) Rocks C) Metals D) Sand

27. One major misuse of biotechnology is

- ☒ A) Bioterrorism B) Vaccination C) Waste treatment D) Biofertilizer production

28. Biological weapons may contain

- ☒ A) Harmful microorganisms B) Salt C) Sugar D) Water

29. Unauthorized cloning of humans is considered

- ☒ A) Ethical misuse B) Good practice C) Agricultural method D) Environmental conservation

30. Which of the following raises ethical concerns?

- ☒ A) Human cloning B) Fermentation C) Composting D) Yogurt making

31. Misuse of biotechnology may affect

- ☒ A) Human health B) Biodiversity C) Environment ☒ D) All of the above

32. Biosafety regulations help to

- ☒ A) Prevent misuse B) Increase pollution C) Reduce education D) Increase disease

33. Ethical guidelines are necessary in biotechnology to

- ☒ A) Ensure responsible research B) Stop all research C) Reduce education D) Increase pollution

34. GM crops should be released only after

- ☒ A) Safety testing B) Advertisement C) Packaging D) Export

35. Which organization regulates genetically modified products in India?

- ☒ A) GEAC B) RBI C) ISRO D) UGC

36. Biotechnology is useful in environmental protection through

- ☒ A) Bioremediation B) Mining C) Welding D) Painting

37. Which Indian organization is dedicated to biotechnology?

- ☒ A) DBT B) RBI C) DRDO D) SEBI

38. DBT stands for

- ☒ A) Department of Biotechnology B) Department of Botany C) Department of Technology
D) Department of Biology Training

39. Biotechnology parks in India promote

- ☒ A) Research and innovation B) Tourism only C) Banking D) Mining

40. Which Indian city is known as a biotechnology hub?

A) Bengaluru

B) Jaipur

C) Agra

D) Patna

41. India's biotechnology industry contributes mainly to

A) Healthcare B) Agriculture C) Industry D) All of the above

42. Biopharmaceuticals are produced using

A) Biotechnology B) Mining C) Metallurgy D) Civil engineering

43. Which Indian scientist is known as the father of the Green Revolution in India?

A) M. S. Swaminathan B) C. V. Raman C) Homi Bhabha D) Vikram Sarabhai

44. Biotechnology supports sustainable development by

A) Conserving resources B) Increasing pollution C) Deforestation D) Soil erosion

45. Which of the following is an example of a biotech product?

A) Recombinant insulin B) Steel C) Cement D) Copper wire

46. The major goal of biotechnology is to

A) Improve the quality of human life B) Increase pollution
C) Reduce biodiversity D) Destroy ecosystems

47. Which sector uses biotechnology for disease diagnosis?

A) Healthcare B) Transport C) Construction D) Banking

48. One advantage of biotechnology in agriculture is

A) Improved crop yield B) Increased soil erosion
C) Reduced productivity D) Water pollution

49. Biotechnology in India has grown rapidly because of

A) Research and government support B) Mining C) Tourism D) Shipping

50. The future of biotechnology mainly depends on

A) Scientific research and ethical use B) Random experiments
C) Deforestation D) Overuse of chemicals

10. Blue biotechnology deals with

- ☒ A) Forests ☒ B) Marine organisms ☐ C) Space research ☐ D) Soil science

11. Yellow biotechnology is associated with

A) Food biotechnology

~~B) Space biotechnology~~

C) Animal breeding

D) Electra

12. Grey biotechnology focuses on

☒ A) Environmental protection

☐ B) Medical treatment

☐ C) Industrial production

☐ D) Genetics

13. Which branch deals with genetic engineering?

☒ A) Modern biotechnology

☐ B) Traditional biotechnology

☐ C) Chemical engineering

☐ D) Mechanical engineering

14. Recombinant DNA technology was developed in

☒ A) 1973

☐ B) 1919

☐ C) 1865

☐ D) 1950

15. DNA double helix was discovered by

☐ A) Mendel and Darwin

☒ B) Watson and Crick

☐ C) Pasteur and Koch

☐ D) Fleming and Jenner

16. The Father of Genetics is

☐ A) Louis Pasteur

☒ B) Gregor Mendel

☐ C) Watson

☐ D) Crick

17. Louis Pasteur is known for his work on

☒ A) Fermentation

☐ B) DNA sequencing

☐ C) PCR

☐ D) Cloning

18. PCR was invented by

☒ A) Kary Mullis

☐ B) Watson

☐ C) Crick

☐ D) Mendel

19. Which of the following is an achievement of biotechnology?

☒ A) Production of insulin

☐ B) Stone carving

☐ C) Iron smelting

☐ D) Bridge construction

20. Bt cotton is developed to resist

☒ A) Drought

☐ B) Insects

☐ C) Flood

☐ D) Salinity

21. Golden Rice is rich in

☒ A) Vitamin A

☐ B) Vitamin C

☐ C) Vitamin D

☐ D) Iron

22. Biotechnology helps in producing

☒ A) Vaccines

☐ B) Plastic

☐ C) Cement

☐ D) Coal

23. Gene therapy is mainly used for

☒ A) Treating genetic disorders

☐ B) Road construction

☐ C) Food preservation

☐ D) Textile production

24. Which technique helps identify criminals using DNA?

☒ A) DNA fingerprinting

☐ B) ELISA

☐ C) Fermentation

☐ D) Microscopy

25. Which field benefits from biofertilizers?

☒ A) Agriculture

☐ B) Astronomy

☐ C) Geology

☐ D) Architecture

40. Which Indian city is known as a biotechnology hub?

A) Bengaluru

B) Jaipur

C) Agra

D) Patna

41. India's biotechnology industry contributes mainly to

A) Healthcare B) Agriculture C) Industry ~~D) All of the above~~

42. Biopharmaceuticals are produced using

A) Biotechnology ~~B) Mining~~ C) Metallurgy D) Civil engineering

43. Which Indian scientist is known as the father of the Green Revolution in India?

A) M. S. Swaminathan B) C. V. Raman C) Homi Bhabha D) Vikram Sarabhai

44. Biotechnology supports sustainable development by

A) Conserving resources B) Increasing pollution C) Deforestation D) Soil erosion

45. Which of the following is an example of a biotech product?

A) Recombinant insulin ~~B) Steel~~ C) Cement D) Copper wire

46. The major goal of biotechnology is to

A) Improve the quality of human life B) Increase pollution

C) Reduce biodiversity D) Destroy ecosystems

47. Which sector uses biotechnology for disease diagnosis?

A) Healthcare B) Transport C) Construction D) Banking

48. One advantage of biotechnology in agriculture is

A) Improved crop yield B) Increased soil erosion

C) Reduced productivity D) Water pollution

49. Biotechnology in India has grown rapidly because of

A) Research and government support B) Mining C) Tourism D) Shipping

50. The future of biotechnology mainly depends on

A) Scientific research and ethical use B) Random experiments

C) Deforestation D) Overuse of chemicals

Adam

Name of student- Tanishka Narke

1. Biotechnology is the application of

- A) Physics B) Biology and Technology C) Mathematics D) Astronomy

2. The term "Biotechnology" was first coined by

- A) Louis Pasteur B) Karl Ereky C) Gregor Mendel D) Robert Koch

3. Karl Ereky coined the term biotechnology in

- A) 1859 B) 1865 C) 1919 D) 1953

4. Which is considered the oldest example of biotechnology?

- A) Tissue culture B) Fermentation C) Genetic engineering D) PCR

5. Bread making is an example of----- biotechnology

- A) Modern B) Traditional C) Medical D) Nanobiotechnology

6. Which microorganism is commonly used in bread making?

- A) E. coli B) Lactobacillus C) Yeast D) Rhizobium

7. Green biotechnology is mainly related to

- A) Agriculture B) Medicine C) Marine science D) Industry

8. Red biotechnology is associated with

- A) Medicine B) Agriculture C) Environment D) Food processing

9. White biotechnology is mainly used in

- A) Industrial production B) Agriculture C) Marine biology D) Forestry

10. Blue biotechnology deals with

- A) Forests B) Marine organisms C) Space research D) Soil science

11. Yellow biotechnology is associated with

A) Food biotechnology

~~B) Space biotechnology~~

C) Animal breeding

D) Electronics

12. Grey biotechnology focuses on

A) Environmental protection

B) Medical treatment

C) Industrial production

D) Genetics

13. Which branch deals with genetic engineering?

~~A) Modern biotechnology~~

~~B) Traditional biotechnology~~

C) Chemical engineering

D) Mechanical engineering

14. Recombinant DNA technology was developed in

~~A) 1973~~

~~B) 1919~~

C) 1865

D) 1950

15. DNA double helix was discovered by

~~A) Mendel and Darwin~~

~~B) Watson and Crick~~

C) Pasteur and Koch

D) Fleming and Jenner

16. The Father of Genetics is

~~A) Louis Pasteur~~

B) Gregor Mendel

~~C) Watson~~

D) Crick

17. Louis Pasteur is known for his work on

~~A) Fermentation~~

~~B) DNA sequencing~~

C) PCR

D) Cloning

18. PCR was invented by

~~A) Kary Mullis~~

~~B) Watson~~

C) Crick

D) Mendel

19. Which of the following is an achievement of biotechnology?

~~A) Production of insulin~~

~~B) Stone carving~~

C) Iron smelting

D) Bridge construction

20. Bt cotton is developed to resist

~~A) Drought~~

B) Insects

C) Flood

~~D) Salinity~~

21. Golden Rice is rich in

~~A) Vitamin A~~

B) Vitamin C

C) Vitamin D

D) Iron

22. Biotechnology helps in producing

~~A) Vaccines~~

~~B) Plastic~~

C) Cement

D) Coal

23. Gene therapy is mainly used for

~~A) Treating genetic disorders~~

~~B) Road construction~~

C) Food preservation

D) Textile production

24. Which technique helps identify criminals using DNA?

~~A) DNA fingerprinting~~

B) ELISA

C) Fermentation

D) Microscopy

25. Which field benefits from biofertilizers?

~~A) Agriculture~~

B) Astronomy

~~C) Geology~~

D) Architecture

Electronic
26. Biofuels are produced using

- ☒ A) Living organisms ☒ B) Rocks C) Metals D) Sand

27. One major misuse of biotechnology is

- ☒ A) Bioterrorism ☒ B) Vaccination C) Waste treatment D) Biofertilizer production

28. Biological weapons may contain

- ☒ A) Harmful microorganisms ☒ B) Salt C) Sugar D) Water

29. Unauthorized cloning of humans is considered

- ☒ A) Ethical misuse B) Good practice ☒ C) Agricultural method D) Environmental conservation

30. Which of the following raises ethical concerns?

- ☒ A) Human cloning ☒ B) Fermentation C) Composting D) Yogurt making

31. Misuse of biotechnology may affect

- ☒ A) Human health ☒ B) Biodiversity C) Environment D) All of the above

32. Biosafety regulations help to

- ☒ A) Prevent misuse ☒ B) Increase pollution C) Reduce education D) Increase disease

33. Ethical guidelines are necessary in biotechnology to

- ☒ A) Ensure responsible research ☒ B) Stop all research C) Reduce education D) Increase pollution

34. GM crops should be released only after

- ☒ A) Safety testing ☒ B) Advertisement C) Packaging D) Export

35. Which organization regulates genetically modified products in India?

- ☒ A) GEAC B) RBI C) ISRO D) UGC

36. Biotechnology is useful in environmental protection through

- ☒ A) Bioremediation ☒ B) Mining C) Welding D) Painting

37. Which Indian organization is dedicated to biotechnology?

- ☒ A) DBT ☒ B) RBI C) DRDO D) SEBI

38. DBT stands for

- ☒ A) Department of Biotechnology ☒ B) Department of Botany C) Department of Technology
D) Department of Biology Training

39. Biotechnology parks in India promote

- ☒ A) Research and innovation B) Tourism only C) Banking D) Mining

40. Which Indian city is known as a biotechnology hub?

A) Bengaluru

B) Jaipur

C) Agra

D) Patna

41. India's biotechnology industry contributes mainly to

A) Healthcare ~~B) Agriculture~~ C) Industry D) All of the above

42. Biopharmaceuticals are produced using

A) Biotechnology ~~B) Mining~~ C) Metallurgy D) Civil engineering

43. Which Indian scientist is known as the father of the Green Revolution in India?

A) M. S. Swaminathan ~~B) C. V. Raman~~ C) Homi Bhabha D) Vikram Sarabhai

44. Biotechnology supports sustainable development by

A) Conserving resources B) Increasing pollution C) Deforestation D) Soil erosion

45. Which of the following is an example of a biotech product?

A) Recombinant insulin B) Steel C) Cement D) Copper wire

46. The major goal of biotechnology is to

A) Improve the quality of human life B) Increase pollution
~~C) Reduce biodiversity~~ D) Destroy ecosystems

47. Which sector uses biotechnology for disease diagnosis?

A) Healthcare ~~B) Transport~~ C) Construction D) Banking

48. One advantage of biotechnology in agriculture is

A) Improved crop yield B) Increased soil erosion
C) Reduced productivity D) Water pollution

49. Biotechnology in India has grown rapidly because of

A) Research and government support ~~B) Mining~~ C) Tourism D) Shipping

50. The future of biotechnology mainly depends on

A) Scientific research and ethical use B) Random experiments
C) Deforestation D) Overuse of chemicals
