Guest Lecture on "Insect in Relation to Man"

21st February 2019

One Page Report

Department of Botany, Vivekanand College, Kolhapur (Autonomous) has organized a guest lecture on "Insect in Relation to Man" by Dr. P. B. Mohite on Tuesday, 21st February 2019. The speaker was introduced by Dr. Abhijeet Kasarkar. Dr. Mohite delivered a excellent talk on how insects balance the nature depends on the activities of parasites and predators, the majority of which are insects. Many insects, including caterpillar hunter beetles, pirate bugs, and praying mantises, keep populations of herbivorous insects in check. Insects are also an important part of the food chain and a direct food source for many animals, including humans. The foremost food product from insects, however, is honey, which is developed by honey bees from the nectar they collect from owers—their "reward" for all that pollinating. Another important benefit of insects is their role in decomposition of organic matter. Total 75 students were present for this session. Anchoring of programme was given by Ms. Ankita Shelar and Ms. Vrushali Patil. Finally, the programme was end up by the vote of thanks proposed by Prof. Snehal Wadkar.
