Yadav is well known taxonomist, who given information about the importance of biodiversity and their conservation. He guided students about ecosystem services gained by human being so that there is need to conserve each and every species on planet to maintain biodiversity. Also given message that, through the education institutes, young minds can be trained to conserve biodiversity and change their views to see towards the natural things which are available free. He further said that, biodiversity of western ghats is being lost due to the loss of habitat, over-exploitation of resources, climatic change, pollution, invasive exotic

species, diseases, hunting, etc. Since it provides us with several economic and ethical benefits and adds aesthetic value, it is very important to conserve this biodiversity. So, we can claim the necessity of biodiversity by considering our degree of dependency on the environment. We depend directly on various species of plants for our various needs. He conveyed message to young generations to maintain ecological balance each species is important without knowing their economic role. Therefore, educational institutes play a vital role in creation of awareness in society to conserve our natural resources and biodiversity. Total 74 students attended the lecture.
