7. Brief description:

To celebrate birthday of Charles Darwin, Department of Botany, Vivekanand College, Kolhapur (An Empowered Autonomous Institute) had organized the online Google form Quizz to raise global awareness about Charles Darwin and his legendary work on dated 12/02/2025.

Darwin’s theory of evolution took the world by storm in November 1859, when he published “On the Origin of Species by Means of Natural Selection,” taking to another level the scientific revolution initiated by mathematician and astronomer, Nicolaus Copernicus , who created a model with the sun at the center of the universe, instead of the earth. Darwin completed this revolution with his transformative and controversial perspective of nature as being “the result of fixed laws,” and not as the work of an exalted Creator. He explained, “A grain in the balance will determine which individual shall live and which shall die – which variety or species shall increase in number, and which shall decrease, or finally become extinct.” As it happens, Darwin’s theory on Natural Selection became the foundation for a new branch of life science called evolutionary biology. So we celebrate Darwin Day to honor Charles Darwin's contributions to science and to encourage scientific inquiry and research.

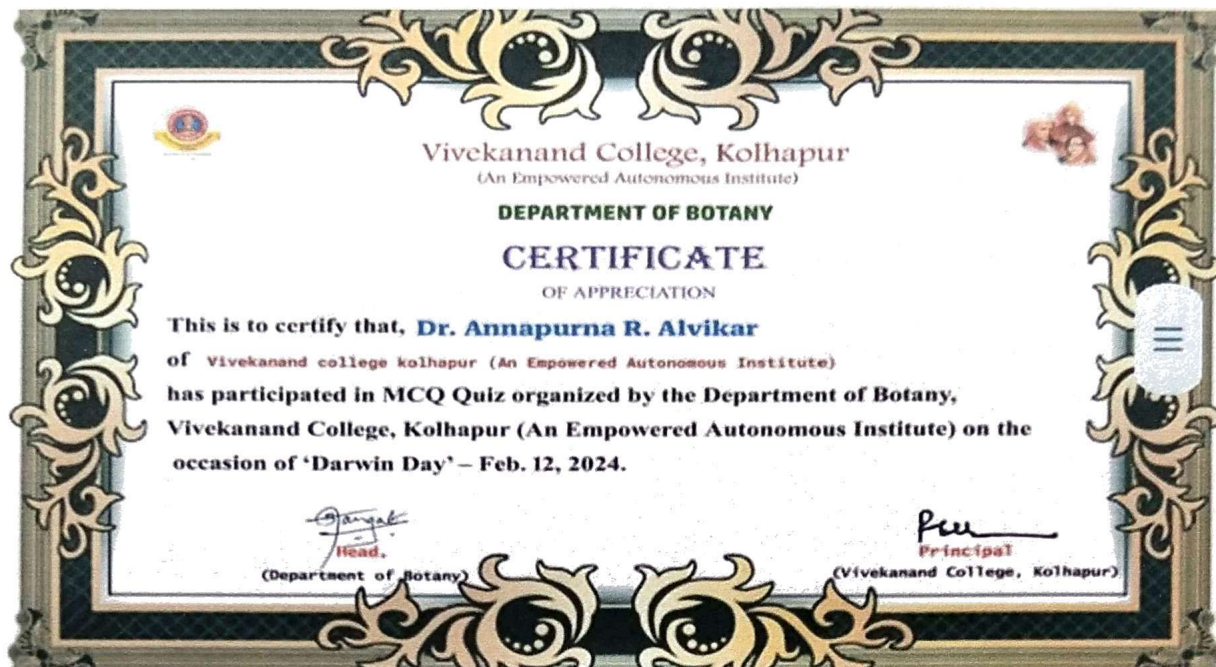

8. Outcomes:

1. Students are motivated by Darwin's legendary work.
2. Students got knowledge about Darwin's revolutionary work in our day today life.
