d. Error of Duplication:

i. Errors in Posting

ii. Errors in Casting

iii. Errors in carrying forward

iv. Errors occurring during extraction of balances etc.

i. Posting errors :-

Posting errors may be of a wrong account, wrong amount or wrong file. For example, amount received from Mr X and credited to Mr Y, purchase of ₹ 360 from Mr A posted in his account at ₹ 630 or sales returns from Mr X posted as the debit of his account etc.

The first type of errors will not affect the trial balance, however the other two will affect the agreement of trial balance.

Casting errors are the errors committed while making the totals. This error affects the trial balance.

iii. Error of carry forward and errors of extraction :-

• Error of duplication :-
Another type of error of duplication is committed which means recording the same transaction twice.

Such errors however, do not affect the trial balance but they will affect the Profit and Loss A/c.

* Conclusion :-

After the errors are committed, they have to be identified and rectified as early as possible for showing the fair view of the accounts. The errors cannot be rectified by erasing or overwriting the errors made because it is treated as manipulation of the accounts which is termed as committing fraud. Rectification of errors is done through a systematic method called "Rectification of Accounting Errors". Every accountant is trained to avoid the errors while recording the transactions, but if errors are made he will try to identify the errors and rectify them as soon as possible.
