		<u>Students Mentoring</u>		
		<u>Report</u>		
		Students mentoring scheme is very important initiative. Through this activity the problems and difficulties of the students can be understood and they can be guided accordingly. While working as a mentor total 17 students including 05 students from B.VOC I & 05 from B.VOC II & 07 from B.VOC III. were guided by me. They were facing some difficulties of academic and physiological nature. They included issues like employment opportunities in various fields, personality development & various skills development, preparing for competitive exams, improving interview skills, etc. various sectoral opportunities after successful completion of B.VOC Foundry Technology course. Personal issues, mental health, physical health etc, on this topics also students were guided accordingly. This activity helped to boost the morale of the students, improve their academic confidence and clear their view regarding career opportunities.
