Lectures	Practical's	Tetal	Module II: Non Destructive	10 Hrs. Principles, classification of testing techniques, merits, demerits and field of	Covered
10	N. A	10	Testing	applications of various non destructive tests visual inspection, radiography, ultrasonic, magnetic particle, eddy current, dye penetrant;	
Month: February 2023			Module/Unit:	Sub-units planned	E.
Lectures	Practical's	Total	Module III: Optical	Principles, methoding, applications;	Covered
10	N. A	10	Metallography techniques		
Month: March 2023		Module/Unit:	i     i     ii       Sub-units planned     5	· · · · · · · · · · · · · · · · · · ·	
Lectures	Practical's	Total	Module IV: Electron	Scanning Electron Microscopy, Transmission Electron Microscopy; Optical emission spectrometer, Atomic absorption spectroscopy, Infrared	Covered
20	N. A	20	Microscopy, Spectroscopy Techniques	Spectroscopy, X-Ray Spectroscopy	ý

	Foundry Tech Dec 2022, Jan		II AECC Module/Unit:	Semester: VI         Course Title: Fracture Mechanics and Analysis of Failure (1733)           Sub-prime land         Remark
March 20 Lectures 50		Total 20	Module I : 1. Functions of Management	Aims of failure analysis, Prime factors in the premature failure of metallic components and structures, Tools and techniques in failure analysis, Types of failures: ductile, brittle, fatigue, creep, corrosion, wear etc., fractography, mixed mode and fatigue failures, Failure mechanisms, Embrittlement phenomena, environmental effects, Failures due to faulty heat treatments, Failures in metal forming and welding, Case studies in failure analysis,
5. A Sub	Karnil Teac	<) here		Prevention of failures, case histories of component failures.
