Prof. Dr. K. Balasubrahmaiam Delivered Lecture on GIS and Land Resource

Dhanashree Shinde is presenting

Determining sample size - Common approaches

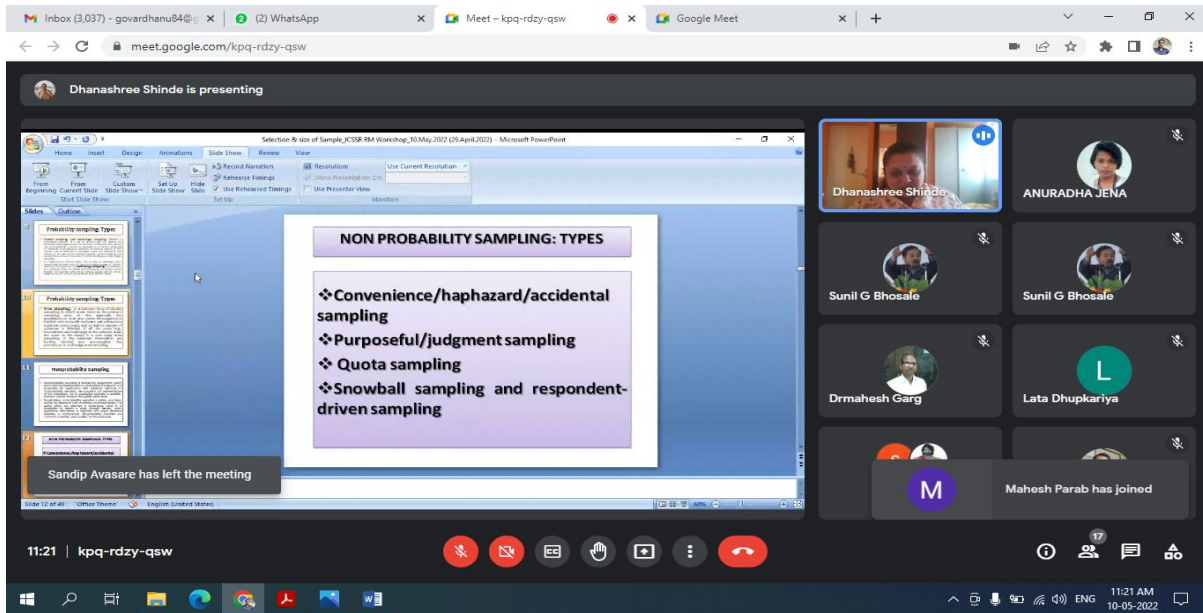

- 1. Using a census for small populations: although cost considerations make census impossible for large populations, a census is attractive for small populations. It provides data on all the individuals in the population and eliminates sampling error.
- 2. Using a sample size of a similar study: a review of the literature can provide guidance about 'typical' sample sizes which are used. Care however should be exercised as to not repeat errors another study made in determining the sample size.
- 3. Using published tables: a third way is to rely on published tables, providing the sample size for a given set of criteria regarding precision, confidence levels, and population variability. The sample sizes are the number of 'obtained' responses, and not necessarily the number of surveys mailed or interviews planned (as non responses are common).

11:37 | kpq-rdzy-qsw

“GEO-FEST 2023”

(Online)

Date: 14th January 2023 to 18th January 2023

Report

1. Name of the Department - Department of Geography

2. Activity – Geo-Fest 2023

3. Aims and Objective

1. Develop capacity for conceptualizing geographical research
2. Enhance skill to proper an appropriate research design
3. Provide overview of contemporary research methodology with GIS and RS
4. To help participants to choose the right methodology for their research.

4. No. of beneficiaries:

Total 71 participants from whole state, professors and college students were present for this program online.

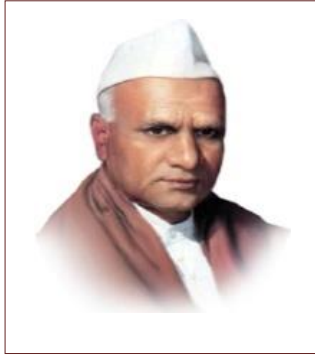

Male	Female
40	31

5. Outcome

- It helped students for improve their knowledge about the research.
- Research students became more interested in research career.
- Research scholars and students get a bright outlook towards problem solving perspective of the society
