c) To create awareness in society for development of sustainable agricultural practices

- **Background:** The Department of Microbiology at Vivekanand College, Kolhapur is running two-year post-graduation course in Microbiology. During second year of this course, students have one module 'Agricultural Microbiology and Phytopathology' which includes applications of microorganisms as bio-inoculants and bio-control agents. The practical knowledge corresponding to this would help students for better understanding of the subject. Similarly, it is mandatory for students to work on a research project in the second year of this course.

In view of these points PG Department of Microbiology decided some objectives and planned to make a Memorandum of Understanding with industry involved in the production of environment friendly agricultural products which are related to subject Microbiology.
