- 9) Brief Description :

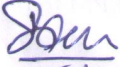

Department of Physics along with IQAC of Vivekanand College, Kolhapur (autonomous) has organized a guest lecture on "Astronomy and Misbelieves in Astrology" on Tuesday, 13th September 2022 at 02.00 PM to 03.30 PM. This guest lecture was delivered by a resource person, Dr. Nitin Shinde, Head, Department of Physics, Karmaveer Bhaurao Patil College, Islampur, Maharashtra, India. Dr. M. M. Karanjkar, Head, Department of Physics, Vivekanand College, Kolhapur has welcomed and introduced the resource person.

Dr. Nitin Shinde in his lecture throwed light on misconceptions and blind beliefs in astrology. He said that it is highly unfortunate that in the land where Vedic astrology was born, most people, even a lot of astrologers, have a lot of misconceptions and blind beliefs about several basic facts of astrology. An astrologer propagates a wrong theory and lots of people believe it. Misconceptions about Mangal dosha, Rakshasa Gana, Kalasarpa dosha and Sadesati have a lot of far reaching effects in our society full of superstitions, especially in marriage matters. Peoples try to find the solution on their astrological problems. According to science, there is zero evidence of any practices being at all helpful in predicting the future or

understanding your life. Dr. Nitin Shinde confirmed through evidence that the position of planets wont help in predicting the future of persons. Students have thoroughly enjoyed the guest lecture and exchanged question to the resource person and received satisfactory answers. Vote of thanks was delivered by Dr. Sanjay Latthe.

10) Outcomes :

- a) Students have thoroughly understood the misbeliefs in astrology.
- b) Students have gained the knowledge that the position of planets wont play role in deciding the future of the persons.
- c) It was also made clear that, while building the homes, the position of blocks wont change our future.
