Academic Year 2025-26

"Mentor-Mentee Report"

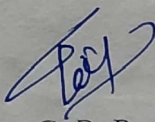

During the academic year 2025-26, regular mentoring sessions were conducted for four mentees Anushka Patil, Rutuja Navale, Muskan Nadaf, and Sanika More to monitor their academic progress and address their academic and personal concerns.

Anushka Patil reported difficulty in understanding concepts related to Animal Biotechnology. She was provided with proper guidance and study notes to improve her conceptual understanding of the subject. Rutuja Navale faced transportation-related issues, particularly bus problems, which affected her attendance. She also experienced some difficulty in preparing notes. Appropriate guidance and academic support were provided to help her overcome these challenges, and she showed improvement over time. Muskan Nadaf faced difficulties due to low marks in test examinations and poor time management. She was guided regarding effective study techniques, time management, and examination preparation strategies. In subsequent mentoring sessions, she reported no major academic concerns, indicating improvement in her overall performance. Sanika More experienced difficulties related to examination skills and lack of interest in certain subjects. She was counseled on improving answer-writing techniques, developing interest in studies, and maintaining regular practice. In later sessions, she reported no significant difficulties and showed gradual improvement in her academic approach and confidence.

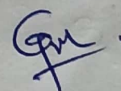

Overall, all four students benefited from regular mentoring sessions. Their academic and personal concerns were addressed through continuous guidance, counseling, and academic support. The mentoring process contributed to noticeable improvement in their academic performance, confidence, study habits, and overall development.
