Academic Year 2022-23

### IT Integration and Examination Reforms Report for the Academic year 2022-23

Vivekanand College continued its commitment to leveraging IT technology for the enhancement of educational processes and examination reforms. In response to the evolving educational landscape, the following highlights showcase the strides made in IT integration and examination practices:

**Examination Mode:** In the academic year 2022-23, the college conducted all regular examinations in the traditional offline mode. However, recognizing the need for adaptability, select SEC (Skill Enhancement Course), Democracy, Election and Good Governance (DEGG), Travel & Tourism, Compulsory Civic Course (CCC) - Constitution of India and Environment Science papers were conducted in an proctored online mode. This blended approach allowed for flexibility and catered to the diverse needs of students.

**Structured Network System:** Building on the foundation laid in the previous academic year, the college successfully installed a comprehensive structured network system covering the entire campus. This system ensures a uniform and reliable internet speed across all nodes, facilitating seamless access to online resources and supporting various IT initiatives.

**Paper Setting Web Module:** A significant milestone in IT integration was the development of a paper setting web module by the Computer Science department. This module streamlines the paper-setting process and is set to be implemented starting with the December 2023 examinations. The integration of this module aims to enhance efficiency, reduce manual errors, and ensure standardization in question paper creation.

**Onscreen Evaluation System:** In the academic year 2022-23, the college is committed to bringing onscreen evaluation to fruition for select professional courses. To support this initiative, the necessary tools (like cutter and Software) for onscreen evaluation have been procured and a comprehensive testing process will be conducted.

**Communication Channels:** The college continued its effective use of various communication channels, including social media platforms such as Telegram, WhatsApp,

Instagram, and the college website. These channels were utilized to disseminate information related to examination processes, form filling, fee payments and other relevant updates. This proactive communication strategy ensured that students were well-informed and prepared for all aspects of the examination cycle.

The academic year 2022-23 has been marked by a strategic blend of traditional and online examination modes, a robust network infrastructure, the development of a paper setting web module and the ongoing efforts towards onscreen evaluation. These initiatives collectively contribute to the college's commitment to embracing technological advancements and ensuring a seamless examination experience for all stakeholders.
