Forest Conservation Day- 23rd July, 2023-2024

Department of Botany, Vivekanand College, Kolhapur (Autonomous).

General Awareness Quiz.

आज 23 जुलै या दिवशी 'वनसंवर्धन दिन' (Forest Conservation Day) हा साजरा केला जातो. हा दिवस निसर्गातील प्रत्येक गोष्टी जसे झाडे, डोंगर, नद्या, वने, प्राणी, पक्षी यांचे संवर्धन व्हावे आणि समाजात नैसर्गिक साधनसंपत्तीविषयी जागृती निर्माण व्हावी म्हणून साजरा केला जातो.

आताच्या चालू युगाला विज्ञान आणि तंत्रज्ञानाचे प्रगतशील युग म्हटले जाते. आधुनिक पद्धतीने मानवी बुद्धी व तंत्रांच्या आधारावर विकास आणि प्रगतीचा आलेख उंचावण्यासाठी जगात चढाओढ करत आहे. हे करत असताना मानवाच्या वाढत्या गरजा, अन्नधान्य, कारखाने, उत्पादने यांची वाढती गरज आणि सोबतच लोकसंख्यानुरसार वाढती मागणी या सगळ्या गोष्टींचा प्रचंड ताण नैसर्गिक साधनसंपत्तीवर पडत आहे.

नैसर्गिक वनसंपत्तीला नष्ट करून त्या ठिकाणी मानव आपली वस्ती बसवत आहे, ही वस्ती बसवताना लोक ही गोष्ट विसरत की विकास गरजेचा अत्यावश्यक आहे तरीच ही वृक्षसंपदा टिकणे त्यापेक्षाही महत्त्वाची आहे.

WORLD OZONE DAY

Earth without OZONE is like house without a roof

International Day for the Preservation of the Ozone Layer

Department of Botany, Vivekanand College, Kolhapur (Empowered Autonomous).
General Awareness Quiz

International Day for the Preservation of the Ozone Layer (World Ozone Day) is a day dedicated to raising awareness about the importance of the ozone layer in our Earth's atmosphere and the ongoing efforts to protect it. The ozone layer, primarily found in the stratosphere, acts as a shield, protecting life on Earth from harmful ultraviolet (UV) radiation from the sun. This day serves as a reminder of the environmental challenges posed by ozone-depleting substances, such as chlorofluorocarbons (CFCs) and halons, and the significance of the international agreements like the Montreal Protocol, which aim to phase out the production and use of these harmful chemicals.

Quality Initiatives/ Activities Report

1. Name of Department: Botany

2. Name of Organized Activity: International Day for the Preservation of the Ozone Layer 2023

3. Date/ Duration: 16th September, 2023.

4. Aims and Objectives:

1. Raise awareness: It aims to educate individuals and communities about the role of the ozone layer in shielding us from harmful ultraviolet (UV) radiation.
2. Promote Environmental Education: Another goal is to promote environmental education and literacy, especially among the younger generation. It seeks to encourage schools, colleges, and institutions to incorporate ozone layer preservation into their curriculum.
3. Highlight Achievements: The day also serves as an opportunity to celebrate and acknowledge the achievements of the Montreal Protocol—a treaty that has successfully phased out the production and use of ozone-depleting substances.
4. Encourage Mitigation Efforts: It aims to inspire governments, industries, and individuals to continue their efforts to mitigate ozone layer depletion. This includes advocating for the development and use of ozone-friendly technologies and practices.
5. Mobilize Action: Ultimately, the day aims to mobilize collective action at local, national, and international levels. It encourages governments and organizations to renew their commitment to the protection of the ozone layer and to take concrete steps toward reducing ozone-depleting substances in the atmosphere.

5. No. of beneficiaries: 101

6. Expenditure & funding agency: /collaborators: No

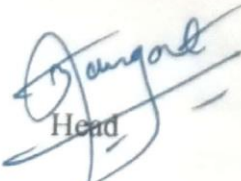

7. Brief description:

The International Day for the Preservation of the Ozone Layer, celebrated on September 16th each year, is a global observance that emphasizes the critical importance of the ozone layer in protecting life on Earth. This day serves as a reminder of the ongoing efforts to combat ozone layer depletion, primarily through the Montreal Protocol. It aims to raise awareness about the dangers of ozone layer damage and the need for international cooperation to phase out harmful substances. Through educational activities and initiatives, it encourages individuals and governments to take actions that contribute to the preservation of this vital atmospheric layer and the overall well-being of our planet.

8. Outcome

The International Day for the Preservation of the Ozone Layer celebration by the Department of Botany at Vivekanand College (Empowered Autonomous) on September 16th, 2023, yielded several positive outcomes. The event significantly raised awareness among students about the crucial role the ozone layer plays in protecting our planet. The online quiz got a stupendous participation of 101 individuals. The participation of students from various age groups fostered a sense of environmental responsibility among the younger generation. The quiz served as a knowledge-sharing platform, disseminating information about sustainable practices and ozone-friendly technologies. The quiz organized by department of botany Vivekanand College (empowered autonomous), Kolhapur inspired participants to adopt eco-friendly practices, such as reducing the use of aerosols and supporting initiatives to phase out harmful chemicals. In sum, the International Day for the Preservation of the Ozone Layer celebration at Vivekanand College's Department of Botany in 2023 proved highly successful in terms of education and advocacy for environmental conservation. It left a significant imprint on participants and set the stage for ongoing efforts to safeguard the ozone layer.

Name of the Department	Department of Physics																		
Name of the Activity	Guest Lecture on "Renewable Energy Sources"																		
Date / Duration	Saturday, 11 th November 2023 at 12.30 PM to 01.30 PM																		
Aims and Objectives	Renewable energy is energy derived from natural sources that are replenished at a higher rate than they are consumed. Sunlight and wind are such sources that are constantly being replenished. Renewable energy sources are plentiful and all around us which are cheaper in most countries, and generate 3 times more jobs than fossil fuels.

Brief Discussion	Dr. Pravin Kharade, Department of Physics, Shankarrao Mohite Mahavidyala, Akluj, Maharashtra, India have discussed on 'Renewable Energy Sources' to the students and faculty. He said in lecture that fossil fuels - coal, oil and gas are non-renewable resources that take hundreds of millions of years to form. Fossil fuels, when burned to produce energy, cause harmful greenhouse gas emissions, such as carbon dioxide. Generating renewable energy creates far lower emissions than burning fossil fuels. Renewable energy is key to addressing the climate crisis. Dr. Sanjay S. Latthe welcomed Dr. Pravin Kharade and Mr. Abhijit Shinde has given vote of thanks.																		
Outcomes	Students got useful information on renewable energy sources and their possible practical uses in day-to-day life.

7.	Brief Discussion	Variety of trees were planted in college premises by the cadets with the help of college co-workers. A tree plantation, forest plantation,plantation forest, timber plantation or tree farm is a forest planted for high volume production of wood, usually by planting one type of tree as a monoculture forest. A forest sequesters carbon in its trees. The forest removes carbon dioxide from the air as trees grow and returns it to the air as trees die and rot or burn. As long as the forest is experiencing net growth, the forest is reducing the amount of carbon dioxide, the leading greenhouse gas, from the air. Furthermore, if timber is regularly removed from the forest and turned into lasting wood products, those products continue sequestering carbon, while the replacement tree farm trees absorb more carbon dioxide, thus effecting a continuous reduction in greenhouse gas. Nearby people were motivated by the action of cadets to plant more trees. Trees play a critical role for people and the planet. Numerous studies have demonstrated that the presence of trees and urban nature can improve people's mental and physical health, children's attention and test scores, the property values in a neighbourhood, and beyond. Trees cool our urban centers. Trees are essential for healthy communities and people The program is successfully managed by the Capt Sunita Bhosale and Lt J R bharamgonda under the guidance of Prin. Dr R R Kumbhar								

8.	Outcomes	<ul style="list-style-type: none"> • Cadets planted nearly 15-20 plants. • They got self-aware and created awareness about cleanliness.
