However, increasing population, industrial advancements and modern agricultural practices stress water resources leading to pollution, scarcity and disruptions in the aquatic food chain and ecosystems. To address these issues, the government has initiated campaigns, rallies and action plans for water conservation. The NCC department of our college organized a cleanliness drive and awareness rally at Rankala. The program, under the guidance of Principal Dr. R. R. Kumbhar, Col. Manjunath Hegde, Major Gugamalati, the CO and AO of 5 Mah Bn and 6 Mah Girls Bn NCC Kolhapur, respectively, was organized by Capt. Sunita Bhosale and Lt. 7.	Brief Discussion	Urban centers and cities are grappling with pollution problems, leading to unhygienic conditions. The challenges arise from unplanned resource utilization and overexploitation. Every individual has the right to clean air and water, but industrialization and urbanization contribute to water and air pollution. The increased use of plastic in domestic, industrial, and medical sectors escalates the generation of wet garbage, resulting in unhygienic conditions. Public places are often dirty and unsuitable for use. In response, the NCC cadets from our college initiated a cleanliness drive at public places near Panchganga Ghat, Central Bus stand, and the railway station. They conducted awareness rallies and actively participated in garbage collection. The cadets collaborated with municipal corporation workers and sweepers dedicated to cleanliness. This cleanliness drive was organized under the guidance of Principal Dr. R R Kumbhar, Colonel Manjunath Hegde, and Colonel Tiwari. The program was efficiently managed by Captain Sunita Bhosle and Lieutenant Jitendra Bharamgonda with the participation of 92 SDs and SWs.						
8.	Outcomes	<ul style="list-style-type: none">NCC cadets are committed to preserving and restoring the invaluable resource of water.They gained knowledge about methods for preserving water resources,						

contributing to sustainable development.

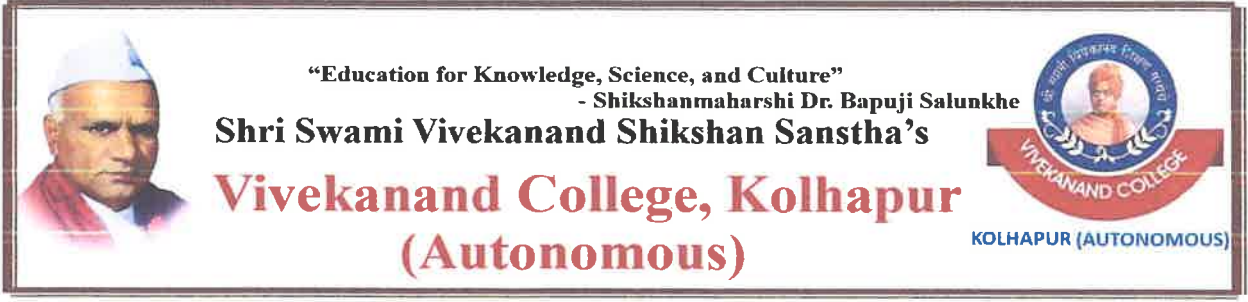

- NCC cadets conveyed the message of restoring and preserving water resources to society and their families .

7.	Brief Discussion	<p>Water is a precious and freely available resource on the Earth's surface. It is essential for various purposes from domestic to industrial use and plays a crucial role in the economic activities of humankind. In India, the abundant availability of water resources supports agricultural and industrial development. However, the increasing population, advancements in agriculture and technological developments have led to a higher demand for water resulting in more intensive use and consequently severe water pollution.</p> <p>The rise in water pollution has led to an increase in waterborne diseases and disruptions in the aquatic ecosystem. To address these challenges various campaigns have been initiated by both government and non-governmental organizations. The NCC department actively participates in community development programs including awareness campaigns. 3.	Date / Duration	26/01/2021		
4.	Aims & Objectives	<ul style="list-style-type: none">To plant various trees to help nature to reduce global warming.To promote the message of cleanliness accountability within society.To create awareness about Tree Plantation.		
5.	No. of Beneficiaries	<u>Total</u>	97	62 girls
		<u>attende</u>		35 boys
6.	Expenditure & Fundings			
7.	Brief Discussion	Variety of trees were planted in college premises by the cadets with the help of college co-workers. A tree plantation, forest plantation, plantation forest, timber plantation or tree farm is a forest planted for high volume production of wood, usually by planting one type of tree as a monoculture forest. A forest sequesters carbon in its trees. The forest removes carbon dioxide from the air as trees grow and returns it to the air as trees die and rot or burn. As long as the forest is experiencing net growth, the forest is reducing the amount of carbon dioxide, the leading greenhouse gas, from the air. Furthermore, if timber is regularly removed from the forest and turned into lasting wood products, those products continue sequestering carbon, while the replacement tree farm trees absorb more carbon dioxide, thus effecting a continuous reduction in greenhouse gas. Nearby people were motivated by the action of cadets to plant more trees. Trees play a critical role for people and the planet. Numerous studies have demonstrated that the presence of trees and urban nature can improve people's mental and physical health, children's attention and test scores, the property values in a neighbourhood, and beyond. Trees cool our urban centers. Trees are essential for healthy communities and people The program is successfully managed by the Capt Sunita Bhosale and Lt J R bharamgonda under the guidance of Prin. Dr R R Kumbhar		

8.	Outcomes	<ul style="list-style-type: none">• Cadets planted nearly 15-20 plants.• They got self-aware and created awareness about cleanliness.

A forest sequesters carbon in its trees. The forest removes carbon dioxide from the air as trees grow and returns it to the air as trees die and rot or burn. As long as the forest is experiencing net growth, the forest is reducing the amount of carbon dioxide, the leading greenhouse gas, from the air. Furthermore, if timber is regularly removed from the forest and turned into lasting wood products, those products continue sequestering carbon, while the replacement tree farm trees absorb more carbon dioxide, thus effecting a continuous reduction in greenhouse gas. Nearby people were motivated by the action of cadets to plant more trees. Trees play a critical role for people and the planet. The program was initiated by Kolhapur Municipal Corporation in guidance of Capt. Sunita Bhosale and ex-cadets.</p>						
8.	Outcomes	<ul style="list-style-type: none">The cadets planted nearly 15-20 plants.They got self-aware and created awareness about cleanliness.

It culminated at Chhatrapati Shivaji Mah Chowk. The Municipal Corporation led this initiative, and the principal, Dr. S. Y. Honge was present for this drive. The event was organized under the guidance of the Command Officers of 05 and 06 Mah girls Bn NCC, Kolhapur, with 30 SD and 59 SW cadets actively participating, along with Captain Sunita Bhosale and Lieutenant J.R. कोल्हापूर : सध्या रंकाव्याचे पाणी झाले हिरवे...जाणून घ्या शास्तीय कारणे...

रंकाळ्याचे धोकादायक हिरवे पाणी...

कोल्हापूर : पाण्यामध्ये क्लोरोफीनयुक्त शेवाळाचे प्रमाण वाढल्याने हानीकारक अलगल ब्लुम्स शेवाळाची वाढ मोठ्या प्रमाणात होते. वातावरणात वाढलेले तापमान, पाण्याची कमी झालेली पातळी, पाण्यातील प्रदूषित घटकांची वाढ आणि प्रखर सूर्यप्रकाश या सर्व गोष्टींमुळे पाण्यामध्ये हिरव्या रंगाच्या शेवाळाची झपाट्याने वाढ होते. हे धोकादायक शेवाळ जलचर प्राण्यांच्या श्वसनासाठी अतिशय धोकादायक असतात. या सर्व गोष्टींचा सविस्तर अभ्यास झाल्यानंतर योग्य ते कारण समजेल, अशी माहिती प्रा. मिलिंद कारंजकर यांनी रंकाळा तलावातील हिरव्या पाण्याचे नमुने घेताना दिली.

The lake was earlier used for providing drinking water to Kolhapur city but now confined to irrigational and recreational use.</p> <p>2) Four nallas are contributing sewage to Rankala Lake thus heavily polluting the lake. Lake is turning green since 2011 because of the presence of these blue green algae.</p> <p>3) Through surface tension measurements, the extent of water pollution was confirmed.</p>																
Outcomes	Washing of animals, clothes, vehicles, bathing activities, immersion of Ganesh idol and Nirmalya, disposal of remains of fast foods at Chaupati in lake, are also contributing pollution in the lake. It was partially confirmed through surface tension measurement.
